Interact-TV Unveils TravelTelly at CES 2006

*Watch Recorded Programs, Listen to Music or View Digital Photos ANYWHERE
using the TravelTelly Portable Multimedia Player*

Las Vegas, NV, January 2, 2006 – Interact-TV™ (OTC:ITVI), a leading developer of Linux-based home entertainment servers, is unveiling its new TravelTelly™ Portable Multimedia Player that lets consumers download and enjoy recorded TV programs, music and digital photos wherever they go. TravelTelly can be seen at the January 2006 International CES, Booth 26818.

“TravelTelly expands the Telly product line out of the home and takes it on the road,” says Ken Fuhrman, President and CEO of Interact-TV. “TravelTelly makes a great travel companion. Consumers will love the freedom that comes with watching their favorite TV programs literally whenever and *wherever* they want.”

The TravelTelly provides DVD quality playback, plus it can connect to a PC, Mac or mass storage device using the USB cable. The TravelTelly’s 3.5” TFT LCD provides a sharp, crystal clear picture. Consumers can enjoy video files both on the TravelTelly itself or use the TV Out function to watch them in 720x480 resolution on a television set. The 20GB Hard Disk Drive stores over 6,000 music and photo files or 30 video files. TravelTelly gives TV viewers the ability to take their favorite shows, sitcoms, or even last night’s game with them to watch anywhere.

The USB On-The-Go function allows direct connections to a Telly, TellyVizion, another TravelTelly or even a digital camera. A USB 2.0 connection makes sure it’s fast and easy to transfer video programs from Telly to the TravelTelly. It takes only about 5 minutes to transfer a one hour program to the TravelTelly. Also, consumers can select programs to transfer at anytime, even if the TravelTelly is not connected to the Telly. Then, the next time they plug in the TravelTelly via the USB cable, all of the selected programs transfer to the TravelTelly.

Every TravelTelly comes complete with a rechargeable lithium-ion battery for up to four hours of video and 12 hours of music playback. Stereo headphones, USB cables, adapter cable, A/V cables, an AC/DC power adapter and a carrying case are standard.

The TravelTelly is expected to have a retail price of \$325. Prices are subject to change without notice. For more information about Telly Home Entertainment Servers and TellyVizion Playback Units, see <http://www.interact-tv.com/products.php>.

About Interact-TV Inc.

Interact-TV Inc. designs innovative products that empower the digital entertainment experience, creating an easy way to access, organize, share and enjoy ever-expanding libraries of movies, music and photos.
